A NEW LEASE OF LIFE FOR BELLA BOO

Dear Ben and Team

Over the past 18 months Bella Boo has been suffering from arthritis in one of her front legs and both back legs. We were at the stage this year when she would not climb the stairs in our house because it was far too uncomfortable for her.

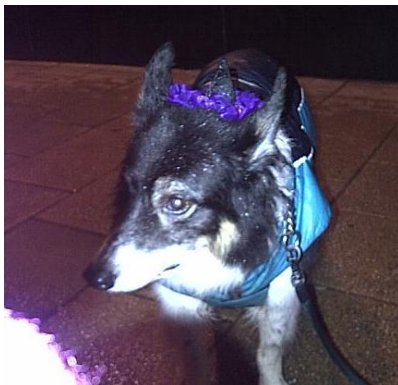

It was whilst we were there for Bella's annual boosters we found out about the K.LASER and we just wanted to write this short note to say thank you very much as Bella has had a new lease of life as a result of the treatment.

In all we took Bella for five short sessions and even after the second treatment we noticed a difference, "we came home from work the next day and Bella Boo was at the top of the stairs as she always used to be waiting to greet us"

Overall an excellent result and would recommend the treatment to others who are suffering pain and joint problems

Many, many thanks

Michael & Christina McGowan
